# Non-Paraxial Polarizer Model Based on Optically Anisotropic Media Theory

**CLEO 2019 – Conference on Lasers and Electro-Optics**

**Poster Session: Number III**

**Session time: 9 May 2019 | 11:30 – 13:00**

## Abstract

We present an idealized polarizer model, based on the fields and modes in optically anisotropic media. The model is derived in the spatial-frequency domain, and the result is presented in a compact 2x2-matrix form.
