

Online Training Course - Technical Requirements

To ensure an easy and smooth online training experience, please take care of the following technical aspects:

Technical Equipment at Your Workplace

- Computer with Windows 10 (Professional Edition, not Home Edition) or Mac OS
- Only Mac OS users: "Microsoft Remote Desktop"-App from App Store has to be installed
- Two screens
- Keyboard and Mouse
- Webcam
- Headset and Microphone
- Stable internet connection

Instructions for Accessing the Virtual Training Computer

We will provide you with a current VirtualLab Fusion software as well as license via virtual training computer. You do not need to receive a physical dongle by us.

How to handle the remote access for the virtual machine please read the guide in advance of the training.

You will receive individual access data by your Sales contact.

Note: It is important that the Remote-Port at your computer is enabled. Please check with your administrator on this.

Instructions for Usage of Training Software "Cisco Webex"

The online training room will be implemented with "Cisco WebEx". Access link to the virtual meeting room will be sent to you with the final details mail in advance of the training day.

Please feel free to browse through our guide on how to use the trainings software in detail.

The guides can be found [here](#).
